The novel

FLEX-SUCTION MAT

for all common systems of vacuum boxes

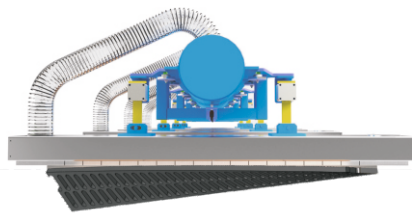

Advantages compared to now known suction mats:

- Higher wear-resistance
- Higher impermeability
- Easy, quick and residue-free removal of the mats due to a special adhesive technique
- The suction mats are always designed in stripes of 2000 mm and can be cut to size on-site
- When adhered to the vacuum boxes, the mats can be pieced together and so avoid waste
- Lower costs for energy due to the high-density foam and therefore a higher availability of the system

The novel **FLEX-SUCTION MAT**

Our newly developed suction mat gets a special treatment and can be customized to match your needs.

Hardness and impermeability is adjusted to the customers demands.

Due to this individual adjustment the energy costs of your plant will be reduced.

Sandwich-construction of the suction mat

Just tell us the thickness and geometry or even easier an adhesive film of your suction mat and we will be pleased to give you an offer without obligation.
